RV Detailing · Hard water map · 2026

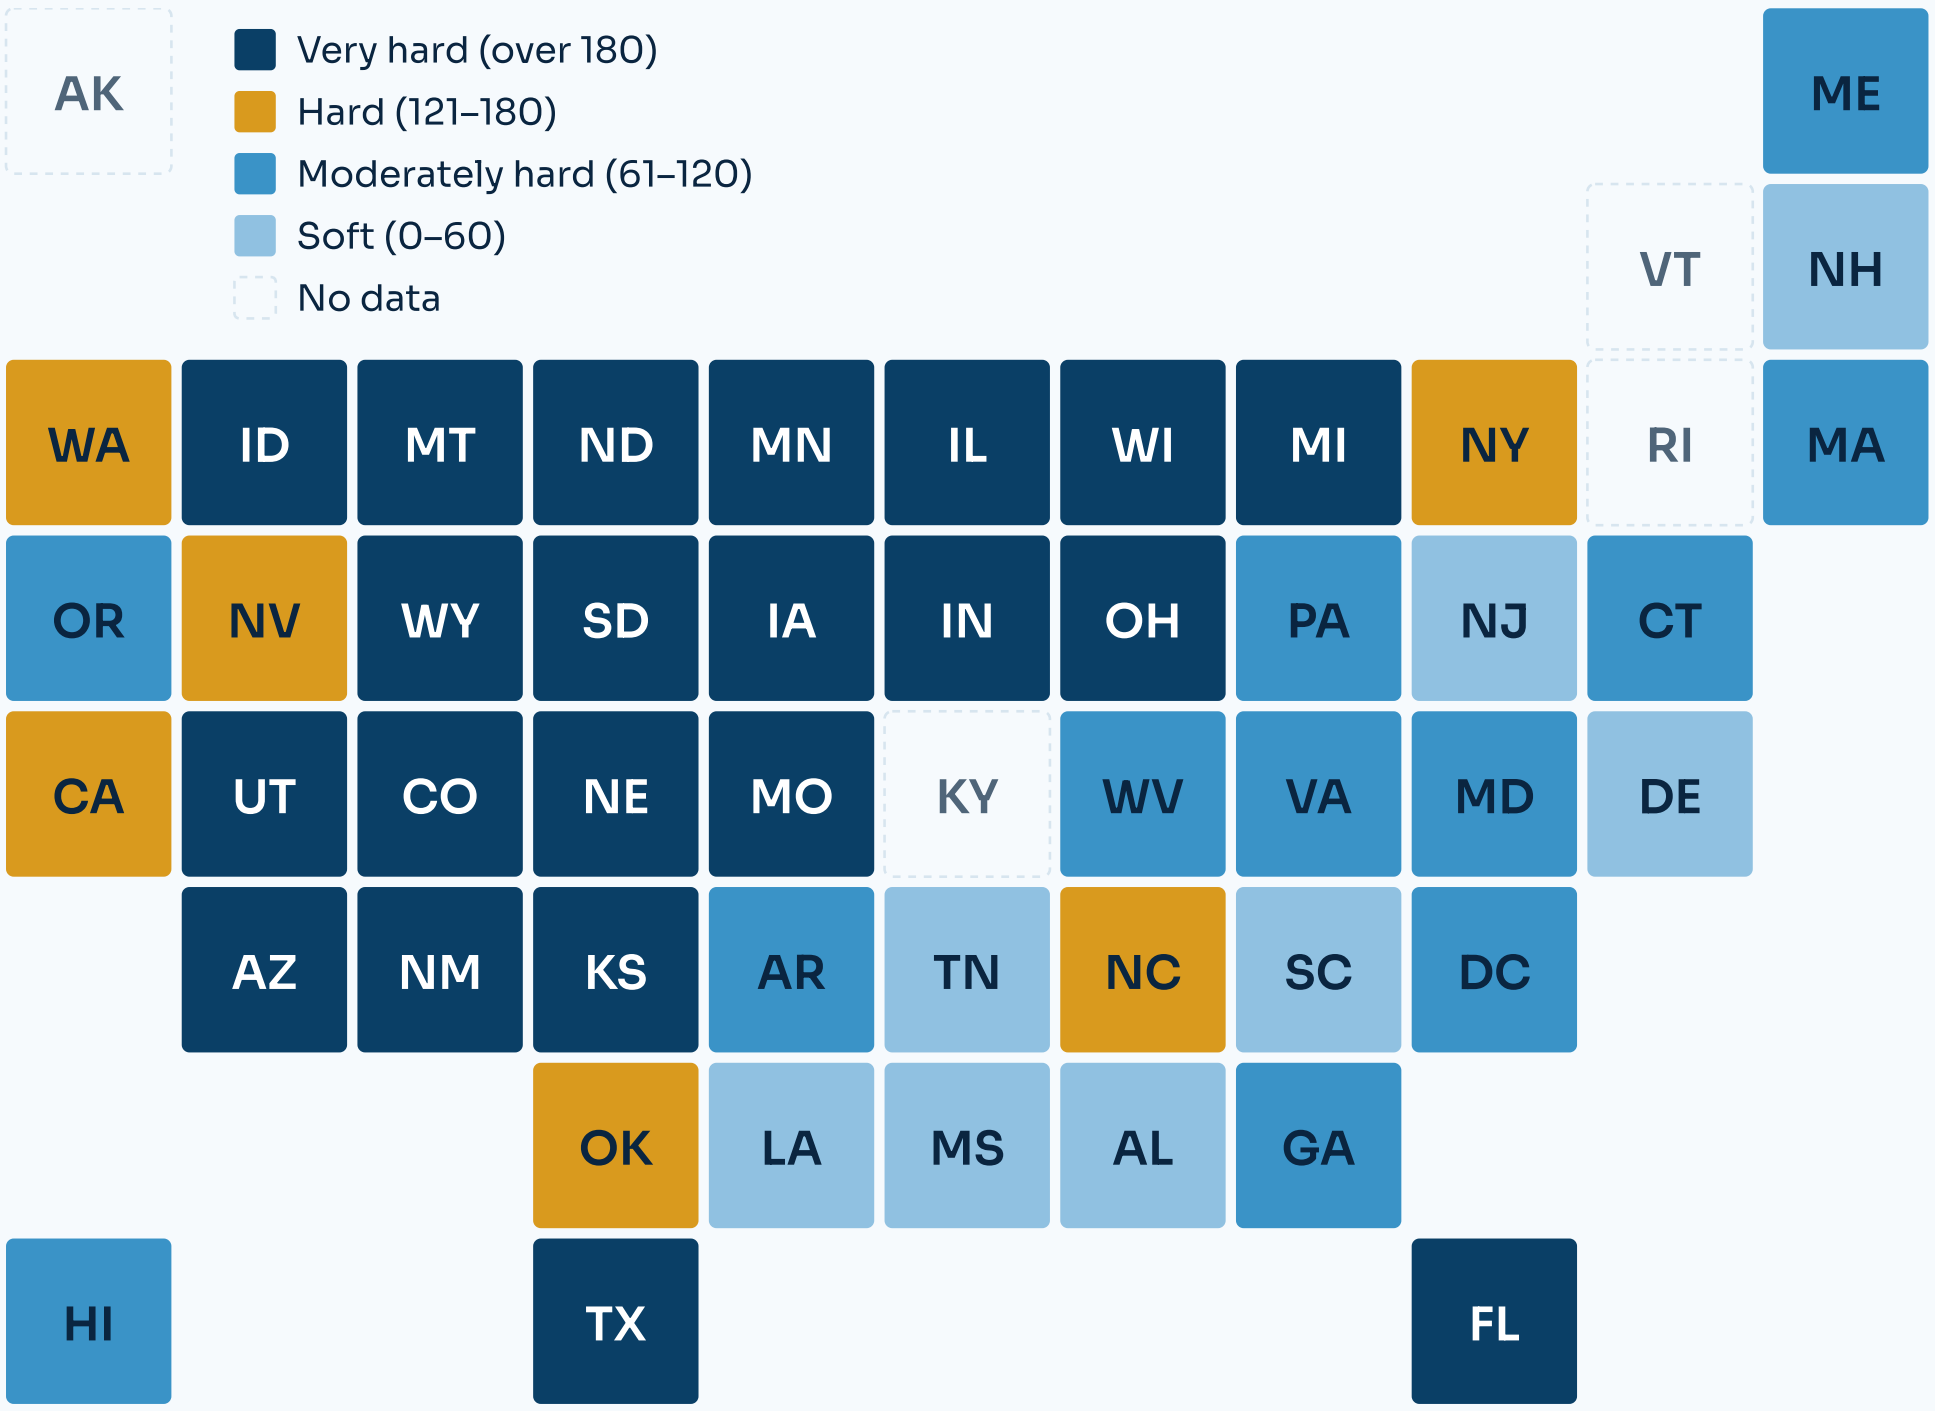

Groundwater tests very hard in 21 states

Median hardness of USGS well-water samples since 2010, by USGS class, mg/L as calcium carbonate.

21
states with a median over 180 mg/L (very hard)

361
mg/L median in Michigan, the highest

31,890
USGS well samples analyzed

Source: RV Detailing analysis of 31,890 USGS groundwater hardness samples from 15,481 wells, 2010–2023, via the Water Quality Portal, Oct 2026.
